

Behavioral Safety Training

Duration: 1 Day

Mode: Online / Classroom / On-Site

Certification: QLSS Certificate of Completion

Course Introduction

Behavioral Safety is an approach that focuses on identifying and influencing employee behaviors to prevent workplace accidents and incidents. It complements traditional safety programs by addressing the human factors behind unsafe actions and near misses.

This training helps participants understand the psychology of behavior, how to observe and modify unsafe behaviors, and how to build a proactive safety culture. It supports the goals of ISO 45001:2018 and is applicable across manufacturing, construction, and service sectors.

Pre-requisites

- Basic understanding of safety principles
- No prior behavioral training required
- Useful for all levels from supervisors to operators

Learning Objectives

- Understand the foundation and principles of behavioral safety
- Learn how behaviors contribute to incidents and near misses
- Practice observation techniques for unsafe and safe behaviors
- Implement behavior-based safety (BBS) checklists and feedback loops
- Promote employee involvement in safety initiatives
- Reduce incidents through behavioral change and culture shift

Course Agenda

1. Introduction to Behavioral Safety
 - Difference between traditional and behavioral safety

- Heinrich's Triangle and behavioral root causes
- Importance of influencing human behavior

2. Psychology of Behavior at Work

- Unsafe acts vs unsafe conditions
- Antecedents, behavior, and consequences (ABC model)
- Motivation, reinforcement, and perception in safety

3. Observation and Communication Techniques

- Peer-to-peer safety observation process
- Use of BBS checklists and tools
- Constructive feedback and positive reinforcement

4. Implementing a Behavioral Safety Program

- Planning and conducting behavior-based observations
- Setting goals and KPIs for behavior improvement
- Engaging leadership and frontline workers

5. Measuring and Sustaining Behavior Change

- Tracking behavior trends and incident reduction
- Success stories and case studies
- Continuous improvement and integration into EHS system

What You'll Receive

- QLSS Certificate of Completion
- Training Material / Handout (PDF Format)
- Final Assessment with Individual Evaluation Report

Who Should Attend

- Safety Officers and EHS Professionals
- Team Leaders and Supervisors
- Plant Heads and Operations Managers
- Internal Auditors and Risk Coordinators
- Employee Safety Committees

Trainer Profile

Our trainers are certified behavioral safety experts and safety psychologists with hands-on experience in implementing safety behavior models across industrial sectors. They focus on real-world situations, interactive simulations, and proven engagement techniques to influence lasting behavioral change in the workplace.

Instructional Methodology

- Use of behavioral observation videos and scenarios
- Peer-to-peer feedback simulation
- Case study discussions on behavior-related incidents
- Use of real-time BBS tools and feedback forms

What Makes QLSS Behavioral Safety Training Unique

- Combines behavioral science with practical safety tools
- Realistic scenarios from shop floor and service environments
- Focus on leadership and peer influence techniques
- Interactive learning and role-play-driven outcomes
- Aligns with ISO 45001 and global safety culture frameworks
