

Lean Six Sigma Green Belt Training

Duration: 1 Day

Mode: Online / Classroom / On-Site

Certification: QLSS Certificate of Completion

Course Introduction

Lean Six Sigma Green Belt Training is designed for professionals involved in process improvement projects. This intensive course equips participants with the tools, techniques, and methodology to lead and support Lean Six Sigma initiatives at the departmental and cross-functional levels.

Through the DMAIC (Define, Measure, Analyze, Improve, Control) framework, learners will solve real problems using data analysis, root cause identification, and process control strategies.

Pre-requisites

- Basic understanding of business processes
- Prior exposure to Lean/Six Sigma awareness (recommended)
- Suitable for project leaders, quality professionals, and analysts

Learning Objectives

- Apply DMAIC methodology to structured problem-solving
- Perform root cause analysis using statistical tools
- Use data to drive improvements and measure success
- Reduce defects, cycle times, and cost of poor quality
- Lead cross-functional teams on improvement projects
- Develop sustainable control mechanisms for long-term gains

Course Agenda

1. Introduction and Project Selection

- Business impact of Lean Six Sigma
- Identifying Green Belt level projects

2. Define Phase

- Project Charter and CTQ Tree
- SIPOC and Voice of Customer (VOC)

3. Measure Phase

- Process Mapping and MSA (Measurement System Analysis)
- Data Collection Plan and Basic Statistics
- Baseline Sigma calculation and capability analysis

4. Analyze Phase

- Graphical tools (Histogram, Boxplot, Pareto)
- Hypothesis Testing (t-test, ANOVA, Chi-Square)
- Root Cause Analysis and Cause-Effect Matrix

5. Improve Phase

- Brainstorming, FMEA, and solution prioritization
- Pilot testing and error-proofing (Poka-Yoke)
- Cost-benefit analysis and risk mitigation

6. Control Phase

- Control Charts and Control Plan
- Visual Management and Documentation
- Project Handover and Replication

What You'll Receive

- QLSS Green Belt Certificate of Completion
- Training Material / Handout (PDF Format)
- Final Assessment and Evaluation Report

Who Should Attend

- Process Improvement Professionals
- Quality Engineers and Managers

- Production, Service, and Support Teams
- Analysts and Internal Project Leaders

Trainer Profile

Our trainers are certified Master Black Belts with years of experience delivering Green Belt and Black Belt training across manufacturing, services, and IT sectors. They provide expert mentoring, real case insights, and practical application of Lean Six Sigma tools in various industries.

Instructional Methodology

- Case-based DMAIC project approach
- Hands-on tool application using Excel or Minitab
- Step-by-step project simulation
- Interactive quizzes and practice sessions

What Makes QLSS Green Belt Training Unique

- Practical problem-solving focus with guided examples
- Coverage of tools from process mapping to hypothesis testing
- Post-training mentoring support (optional)
- Aligned with international Six Sigma Body of Knowledge (BoK)
