

Lifestyle Disease Prevention Training

Duration: 1 Day

Mode: Online / Classroom / On-Site

Certification: QLSS Certificate of Completion

Course Introduction

Lifestyle Disease Prevention Training is focused on raising awareness and equipping employees with knowledge and habits to prevent common chronic illnesses such as diabetes, hypertension, obesity, and cardiovascular conditions. This training is vital for promoting a healthy workforce, reducing absenteeism, and supporting long-term productivity, especially in sedentary and high-stress roles within IT and mechanical sectors.

Pre-requisites

- Open to all employees
- No prior health education required
- Recommended for all age groups and job roles

Learning Objectives

- Understand causes and risk factors of lifestyle-related diseases
- Learn signs and early symptoms of common chronic conditions
- Gain knowledge on nutrition, exercise, and sleep hygiene
- Explore preventive screenings and medical checkups
- Develop sustainable habits for long-term health
