

Stress Management and Mental Health Awareness Training

Duration: 1 Day

Mode: Online / Classroom / On-Site

Certification: QLSS Certificate of Completion

Course Introduction

Stress Management and Mental Health Awareness Training is designed to help employees understand the impact of workplace stress, recognize early warning signs of burnout or anxiety, and adopt effective coping strategies. The training promotes emotional wellbeing, resilience, and a supportive organizational culture, particularly important in high-pressure roles across IT and mechanical sectors.

Pre-requisites

- Open to all employees
- No prior training required
- Recommended for both leadership and staff roles

Learning Objectives

- Recognize common causes and symptoms of workplace stress
- Learn to manage emotions and build mental resilience
- Understand the importance of psychological safety at work
- Explore simple, actionable strategies to reduce stress
- Create a supportive environment through better communication

Course Agenda

1. Understanding Workplace Stress
 - Stress vs. pressure – what's healthy and what's not?
 - Physical and psychological symptoms of unmanaged stress
2. Causes and Risk Factors
 - Role-based, interpersonal, environmental stressors
 - Common triggers in IT and industrial workplaces
3. Tools and Techniques to Manage Stress
 - Time management and workload balance
 - Mindfulness and deep breathing techniques
 - Relaxation and energy renewal strategies
4. Building Mental Resilience
 - Positive thinking and cognitive reframing
 - Emotional intelligence and coping models
5. Workplace Mental Health Culture
 - Identifying early warning signs in colleagues
 - Creating a stigma-free environment
 - Encouraging support-seeking and EAP awareness

What You'll Receive

- QLSS Certificate of Completion
- Training Material / Handout (PDF Format)
