

TISAX Awareness Training

Understanding Trusted Information Security Assessment Exchange (TISAX)
Requirements for the Automotive Industry

Duration: 1 Day

Mode: Online / Classroom / On-Site

Certification: QLSS Certificate of Completion

Course Introduction

TISAX (Trusted Information Security Assessment Exchange) is a recognized standard for information security in the automotive industry, particularly among OEMs and Tier 1 suppliers. This 1-day awareness training is designed to provide participants with a foundational understanding of TISAX objectives, structure, assessment levels, and how it differs from ISO 27001.

The course will help internal stakeholders, project managers, IT, and compliance teams prepare for TISAX assessments and align their operations with the VDA ISA framework.

Pre-requisites

- No prior knowledge of TISAX or ISO 27001 required
- Familiarity with basic IT or quality processes is helpful

Learning Objectives

- Understand the background and purpose of TISAX
- Identify the structure of VDA ISA and its core domains\
- Distinguish between TISAX Assessment Levels (AL1, AL2, AL3)
- Recognize TISAX-specific controls for information security, data protection, and prototype handling
- Compare TISAX with ISO 27001:2022
- Understand audit expectations and evidence requirements
- Plan initial gap assessments and readiness activities

Course Agenda

1. Introduction to TISAX
 - What is TISAX and why it is used
 - History and governance (ENX, VDA, ISA)
2. VDA ISA Structure and Scope
 - Overview of the ISA Questionnaire
 - Domains: Information Security, Data Protection, Prototype Protection
 - ISA maturity levels and scoring system
3. Assessment Levels and Sharing Mechanism
 - AL1, AL2, AL3 explained
 - Role of the audit provider (TISAX-accredited)
 - Result sharing and ENX portal overview
4. Key Control Areas
 - ISMS basics (policies, risk management, asset handling)
 - Data protection expectations (aligned with GDPR)
 - Physical security and prototype protection
5. TISAX vs ISO 27001
 - Mapping TISAX controls to ISO 27001 Annex A
 - What TISAX asks beyond ISO 27001
6. Readiness Preparation
 - Common gaps and how to address them
 - Evidence checklist for AL2/AL3
 - Next steps after this training

What You'll Receive

- QLSS Certificate of Completion
- PDF Training Slide Pack
- Sample VDA ISA questionnaire (public version)
- Gap checklist and readiness worksheet

Who Should Attend

- IT Managers and CISOs
- Quality and Compliance Officers
- Project and Operations Managers
- R&D and Prototype Coordinators
- Information Security and Data Privacy Teams

Trainer Profile

Delivered by experienced information security consultants and TISAX implementation specialists with hands-on experience preparing Tier 1 and Tier 2 suppliers for AL2 and AL3 readiness. Trainers bring deep insight into audit expectations, evidence preparation, and client success stories from the automotive ecosystem.

Instructional Methodology

- Instructor-led presentations and real-world examples
- Interactive Q&A and discussion
- Hands-on walkthrough of VDA ISA questionnaire
- Scenario-based discussion on prototype and data handling
- Readiness planning activity

What Makes QLSS TISAX Awareness Training Unique

- Delivered by TISAX practitioners with real assessment experience
- Includes VDA ISA walkthrough and readiness checklist
- Covers assessment level differences and evidence requirements
- Tailored for Indian suppliers serving German and EU OEMs
- Provides guidance on how to initiate a TISAX program post-training
