

Behavior-Based Safety (BBS) Training

Duration: 1 Day

Mode: Online / Classroom / On-Site

Certification: QLSS Certificate of Completion

Course Introduction

Behavior-Based Safety (BBS) is a process that focuses on employee behavior as the cause of most work-related injuries and illnesses. It emphasizes proactive observation and feedback to reinforce safe practices and discourage at-risk behavior.

This training program guides participants through the steps required to build a successful BBS system. Participants will learn how to conduct behavioral observations, use data to improve safety performance, and foster a culture where employees are actively engaged in maintaining a safe work environment.

Pre-requisites

- Basic knowledge of workplace operations
- Prior exposure to safety practices is helpful but not required
- Suitable for team leaders, safety committees, and frontline staff

Learning Objectives

- Understand the core concepts and philosophy behind BBS
- Learn how to plan and implement a Behavior-Based Safety process
- Conduct effective behavioral safety observations
- Provide constructive feedback and coaching
- Track, analyze, and act on BBS data
- Build team-based ownership and improve safety culture

Course Agenda

1. Introduction to Behavior-Based Safety
 - Origins and benefits of BBS

- Safety culture vs. safety compliance
- Elements of a BBS program

2. Behavioral Observations

- What to observe and how to observe
- Safe vs. at-risk behaviors
- Using observation checklists effectively

3. Feedback and Coaching

- Providing real-time feedback
- Using positive reinforcement techniques
- Dealing with resistance and non-compliance

4. BBS Data Management

- Logging and interpreting observation data
- Using data for decision-making
- Trends, reporting, and KPI development

5. Program Implementation and Sustainability

- Gaining leadership and workforce buy-in
- Continuous improvement and integration with existing systems
- Role of communication, recognition, and follow-through

What You'll Receive

- QLSS Certificate of Completion
- Training Material / Handout (PDF Format)
- Final Assessment with Individual Evaluation Report

Who Should Attend

- Safety Leaders and HSE Coordinators
- Team Leaders and Supervisors
- Line Managers and Shop Floor Personnel
- HR and Training Officers
- EHS Committee Members

Trainer Profile

Our trainers are skilled safety consultants and BBS practitioners with practical experience across diverse industries. They bring proven implementation knowledge of observation programs, safety behavior measurement, and cultural transformation techniques that make workplace safety employee-driven and sustainable.

Instructional Methodology

- Scenario-based behavioral simulations
- Structured role-play for feedback and coaching
- Interactive tools and real observation templates
- Collaborative exercises and KPI review

What Makes QLSS BBS Training Unique

- Deep dive into observation, reinforcement, and tracking
- Behavior-first approach to safety enhancement
- Tailored templates and tools for real-time deployment
- Leadership engagement and worker ownership focus
- Builds practical capability in line with ISO 45001:2018
