

Environment, Health & Safety (EHS) Training

Duration: 1 Day

Mode: Online / Classroom / On-Site

Certification: QLSS Certificate of Completion

Course Introduction

Environment, Health & Safety (EHS) is a critical component of responsible business operations. EHS training enables employees and stakeholders to understand and manage environmental impacts, occupational health risks, and workplace safety hazards in line with legal and regulatory requirements.

This training equips participants with the knowledge and skills to identify hazards, understand compliance obligations, and promote a culture of safety and environmental stewardship. It supports implementation of ISO 45001:2018 and ISO 14001:2015 standards.

Pre-requisites

- Awareness of basic operational processes
- No prior EHS training required
- Suitable for all levels of the workforce

Learning Objectives

- Understand the principles of Environment, Health & Safety (EHS)
- Recognize workplace hazards and environmental aspects
- Learn applicable legal and regulatory requirements
- Understand roles and responsibilities under ISO 45001 and ISO 14001

- Promote employee well-being, emergency preparedness, and risk control
- Support EHS audits and internal EHS programs

Course Agenda

1. Introduction to EHS

- Definitions and importance
- Regulatory landscape and corporate responsibility
- ISO 14001 & ISO 45001 overview

2. Environmental Awareness

- Environmental aspects and impacts
- Waste management, water and energy use
- Pollution prevention and resource conservation

3. Health and Wellbeing at Work

- Physical and ergonomic health risks
- Chemical and biological hazards
- Workplace hygiene and occupational health programs

4. Safety Practices and Hazard Management

- Hazard identification and risk assessment
- Incident prevention, reporting, and investigation
- Emergency preparedness and response

5. EHS Roles and Legal Compliance

- Legal registers and applicable laws
- Worker rights and responsibilities
- Documentation and EHS communication

6. EHS Culture and Continuous Improvement

- Behavior-based safety and leadership involvement
- Safety committees and toolbox talks
- Internal audit, review, and performance metrics

What You'll Receive

- QLSS Certificate of Completion
- Training Material / Handout (PDF Format)
- Final Assessment with Individual Evaluation Report

Who Should Attend

- Factory and Plant Employees
- Health, Safety & Environment Teams
- Supervisors and Team Leaders
- Process Owners and Line Managers
- Internal Auditors and Compliance Officers

Trainer Profile

Our EHS trainers are certified professionals with industry experience in environmental compliance, occupational safety, and health risk management. They blend regulatory expertise with real-world examples and interactive techniques to create awareness, enhance responsibility, and promote safe, sustainable work practices.

Instructional Methodology

- Concept explanation through visuals and videos
- Case study discussion on EHS failures and best practices
- Group activities to reinforce hazard identification and controls
- Hands-on tools for aspect-impact evaluation and legal awareness

What Makes QLSS EHS Training Unique

- Covers both ISO 14001 and ISO 45001 frameworks
- Practical focus on Indian statutory laws and global compliance
- Real-life incident case discussions
- Participant-level customization and group work
- Empowers operational teams to build a safety-first mindset
